

ENVIRO-SAFETY GRIP™

ANTI-SLIP FORMULATION
POLLUTION FREE

“55% of all slip-and-fall accidents occur as a result of floor surfaces. The most likely slip-and-fall victim is an elderly individual.”

- National Floor Safety Institute

The number one floor safety treatment protocol in the world, Enviro-Safety Grip™ greatly reduces slip hazards and falls. Ideal for indoor and outdoor pool and spa areas, locker rooms, bathrooms, showers, decks and walkways. No set up, curing or drying time is required. Enviro-Safety Grip™ treated floors are actually safer wet than dry, and exceed OSHA and ADA requirements. Our treatment often covers both general liability and workers' compensation insurance. ADA tax credits may be available.

According to the U.S. Department of Labor, an average slip and fall injury costs roughly \$28,000, putting financial strain on individuals as well as companies where such an injury occurs.

Benefits:

- Indoor/ Outdoor Applications
- Available in 4 Levels of Aggregate
- Good All Weather Traction
- ADA and OSHA Compliant
- Water- Based
- Odorless & Colorless
- Non-Toxic Technology after Drying
- Prevents Bio-Film Buildup
- Easy Cleaning & Maintenance
- Will not Crack, Peel, or Chip
- Two-Year Warranty
- Reduce Liability Costs
- Improved Employee & Customer Safety

Product Descriptions

ENVIRO-SAFETY GRIP™ 01 Anti-Slip Formulation

Smooth formula without grit. Adheres to high-gloss surfaces such as marble or polished stone where protecting gloss or floor finish is important. Maintains appearance close to the original surface. Ideal for wood or vinyl laminate flooring in office environments and homes. Provides slip resistance in areas that are not likely to become extremely wet or oily.

ENVIRO-SAFETY GRIP™ 02 Anti-Slip Formulation

Very fine aggregate similar to 200 grit sandpaper. Ideal for bathtubs, showers, spas and bathrooms. A perfect solution for any indoor, commercial or retail location using VCT, concrete, ceramic tile or any other flooring. Treated surfaces are easy to clean via traditional floor cleaning modalities. Common places include hospitals, restaurants, grocery stores, retail stores, and hotels.

ENVIRO-SAFETY GRIP™ 03 Anti-Slip Formulation

Uses a coarse aggregate akin to 100 grit sandpaper. For indoor and outdoor environments that need protection against slip and fall injuries. For greater slip resistance, with a less visible and easier to clean coating than Enviro-Safety Grip™ 04. Will provide effective slip and fall resistance even with wet or oily surfaces.

ENVIRO-SAFETY GRIP™ 04 Anti-Slip Formulation

Coarse aggregate similar to a 50 grit sandpaper. For factories, warehouses, auto repair shops, indoor and outdoor pool areas, spas, wood decks, synthetic permadeck, and hotel/condominium walkways or entryways. Ideal for industrial and outdoor environments where wet conditions may occur due to rain water, puddling, or pool water. Provides slip and fall resistance even with wet or oily

ENVIRO-DURACOTE™ is a high solids, water based, tough and durable coating specially designed to provide a colorized, anti-slip surface to indoor and outdoor areas such as patios, pool decks, driveways, sports arenas, malls, ramps, walkways, manufacturing floors, warehouses, loading docks, etc. exposed to rain, liquids, oil, grease and other slippery contaminants.

ENVIRO-DURACOTE™ has high tensile strength and abrasion resistance along with long term weatherability to provide years of useful service.
